DATE MAILED: 06/21/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/717,348

Applicant(s)

LEWIS ET AL.

Examiner

Jonathan Johnson

Art Unit

1725

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) 8-15 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-7 and 16-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 8-15 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 16-20 are drawn to a method of applying a thermally conductive material, classified in class 228, subclass 180.22.
- II. Claims 8-15 are drawn to a electronic device, classified in class 361, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by an ultrasonic bonding process.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Michael Bernadicou on 5-31-05 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-7 and 16-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 8-15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7, and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,462,285 (Enroth). Enroth teaches applying thermally conductive material to a first side of a structural layer, the structural layer having a connection pad on the first side of the structural layer (figure 8, item 32), a via extending from the first side to a second side of the structural layer (figure 8, item 33), and a conductive trace between the via and the connection pad on the first side of the layer (figure 8, item 38), the thermally conductive material being applied to be in contact with at least one of the via and the conductive trace (figure 8, item 70); connecting a first component to the connection pad (figure 8, item 56); and heating a second side of the structural layer after connecting the first component to the connection pad (figure 8, item 60); connection pad comprises a ball grid array pad; and the first component is connected to the ball grid array pad with solder (figure 8, item 56); applying solder paste to the ball grid array pad before applying the thermally conductive material to the first side of a structural layer (figure 8, item 56); wherein heating the second side of the structural layer comprises at least part of a wave solder process that connects a second component to the structural layer (figure 8, item 60 and 84); wherein the thermally conductive material is not removed from the structural layer (col. 5, ll. 25-46); connecting a first component to the connection pad with a first connection material

Art Unit: 1725

having a melting point (figure 8, item 56); and connecting, after connecting the first component, a second component to a second side of the layer after connecting the first component to the connection pad (figure 8, item 56), wherein the second component is connected to the second side with a second connection material raised to a temperature at least as high as the melting point of the first connection material (col. 5, ll. 25-46).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over 6,462,285 (Enroth) as applied to claim 1 above and further in view of US 6,815,817 (Akram). Akram teaches the use of a thermal epoxy using a syringe (col. 4, ll. 25-35 and figure 6, item 34). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the plug of Enroth to utilize the thermal epoxy in order to help transfer heat from the flip chip (see Akram col. 4, ll. 20-50).

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over 6,462,285 (Enroth) as applied to claim 16 above and further in view of US 6,815,817 (Akram). Akram teaches the use of a thermal epoxy using a syringe (col. 4, ll. 25-35 and figure 6, item 34). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify

Art Unit: 1725

the plug of Enroth to utilize the thermal epoxy in order to help transfer heat from the flip chip (see Akram col. 4, ll. 20-50).

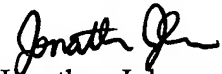

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Johnson whose telephone number is 571-272-1177. The examiner can normally be reached on M-Th 7AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on 571-272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
